Application/Control Number: 09/883,249

Art Unit: 1652

Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1-9 and 19-29, drawn to a polynucleotide nickase containing one subunit capable of cleaving one strand of DNA and a second subunit incapable of cleaving the other strand of DNA, a method for introducing nicks into DNA by using the nickase and a kit, classified in class 435, subclass 199 and 91.1.
- II. Claims 10-18, drawn to a process for producing a nickase containing one subunit that will cleave one strand of DNA and a second subunit capable of cleaving the other stand, classified in class 435, subclass 199.

The two groups are drawn to two enzymes that have different properties and thus are different enzymes and are patentably distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
